Skills

Programming	C, C++, Java, Python, C#, Rust, Kotlin, Lua, JavaScript, ...
Scripting OS	shell, PowerShell, Groovy, ...
Frameworks	GNU/Linux (+OE/Yocto), MS Windows, FreeRTOS
Graphics	Qt, GLib/GTK
Multimedia	OpenGL
DB	FFmpeg, XMP
Build	SQLite, PostgreSQL, MS SQL Server
SCM	CMake, Meson, Gradle
Containers	Git, Mercurial, Fossil
Web	Docker, Podman, systemd-nspawn
Mobile	Svelte
Embedded	Android
IDE	Arduino, PlatformIO, Raspberry Pico, AVR
Debugging	Neovim/PDE
Reverse	GDB, Valgrind, perf, Inav Ghidra

Education

1998–2004	Master of science in Applied Physics, Taras Shevchenko National University of Kyiv, faculty of Radiophysics, department of Medical Radiophysics.
1995–1998	Graduate, Ukrainian Lyceum for Physics and Mathematics by KNU.

Languages

Ukrainian	Mother tongue
English	Fluent (7.0 IELTS-general, 2012)
Spa/Ger/Fre	Common usage

Hobbies

Parenting, fitness, home automation, electronics.

Experience

2016/11–	Luxoft, Lead SW Developer. Project Imagine. • Multimedia processing and broadcasting: Java, C++, FFmpeg, IPP, WebRTC, RTP, ... • Real-time graphics: OpenGL, C++, XMP, Java, ...
2024/01–2024/10	Luxoft, сторонний проект. Radiation control for meteo.gov.ua. • Remote γ-ray sensor management: Raspberry Pi CM3 + UPS, Yocto Linux, C++, SQLite, MQTT • Android app for portable γ-ray sensors: Kotlin, BLE, MQTT • γ-ray spectrometry: C++, WA
2013/06–2016/10	Luxoft, Team leader/Architect. Project LGE webOS TV. CoreOS: libpbnjson, luna-service2, etc. Architecture: system bus, API, devmode, security.
2007/03–2013/05	Visonic, Team leader. • 20%: Management of a 4-developer team • 80%: Server application development (PowerManage™).
2003/11–2006/12	ITV systems, Programming engineer. Security appliances management software.
2003/09–2003/11	Managerial systems, Programming engineer. LCD GUI library for embedded applications. Open source after 10 years of production: 🌀 ThermoPlast.

Projects

Punching for orienteering

Open source systems for orienteering competitions.
🌀 QR O-Punch mobile web app accessing camera to scan QR codes on controls: HTML + JS + CSS
🌀 Arduin-o-punch collects punches on a 1K Mifare card (NFC): Hardware AVR or ESP32-C3, Arduino/C++, Android/Kotlin, Svelte web UI.

Personal: Home automation

Built IoT dashboard with Home Assistant, ESPHome and custom sensors via MQTT.
